The underwater world has its own news as well.
This funny photo-story shows how it looks in the
manner we are used to.

Good afternoon! Welcome
to the program “Underwater news”!
I’m its all-time presenter Sharky Boom.

As usual, let's start with the political news. The President of Our Seas moved to Their seas to visit the congress of vegetarians – he likes them very much.

Some disputes this week have
arisen between sharks...

...and barracudas.

These gluttons again
couldn't share sardines.

The sharks insist that they
should have more food –
by 20 per cent.

Let's recall that a year earlier
the same dispute ended up when
a part of barracudas had been eaten,
and the parties obtained consensus.

Now about safety. Yesterday our frontier whale swam at one meter from the aliens' ship and made them understand that we were not afraid of them.

And now about some cheering news.
Another muraena has changed
its sex on reaching the age of two.

The mother-to-be has been enjoying her new interesting possibilities for the whole week.

Social news. After almost three-day
separation star couple of clownfish –
Ne and Mo came together.
Joy of their fans knows no bounds.

Cultural news. The 72nd part of saga “War of Atolls” by great Joe Turtin has come out. Sooner viewers of the reef will see its film version.

About fashion. The annual fashion show took place at the reef Vogue.

This season new bold colors
were presented there...

...and unusual shapes.

The latest make-up from
Oceanel was also shown.

As usual, upon the end of the fashion show
there was a traditional two-day party.

About sports news.
Our sea-ball team surprisingly
has won at the tournament.

As the coach said, this year the tactics of muddling water at the opponent's gates was quite successful.

About
agricultural
sector.
In the
northern seas
due to the bad
weather
the harvest
of luminaria
and ...

...and
mushrooms
Choku-boku
is considerably
lower than
the last
years' one.

About crime news. Yesterday one reef grouper was gripped between stones by unknown bubbly. Personal courage and remarkable speed helped the boy to avoid problems.

About health. Professor Hammer
from the Galapagos Seas
after multi-year research
has established that...

...octopuses'
smoking is
significantly
changing
their taste.

Here are some advertisements.
Fresh products without nitrates
and carcinogens have come
in the North Seas.

Real gourmets have already arrived there.

In the prestigious atoll's area premium two-bedroom caves went on sale. The first clients will get designer's renovation as a bonus.

At the end, as usual, weather-forecast. The season of plankton was changed by the season of jellyfish at our reef. It seems that the world's climate changes affect us stronger and stronger.

That is all. I, Sharky Boom,
was here together with you.
Ciao!
